*Reason for Allowance*

1. Regarding claims 1-10, the prior art fails to teach or suggest a communication apparatus performing periodic communications with another communication apparatus via a transmission line, comprising a communication control portion operable to set a communication period to  $L^x m/n$  to perform communications, wherein  $L$  is a variation cycle of characteristics of a transmission line,  $n$  is an integer that is 2 or larger, and  $m$  is an integer that is greater than or equal to  $n$  and whose greatest common measure with  $n$  is 1, and a transmission line estimation portion operable to estimate the characteristics of the transmission line within a time  $L/n$  after a certain offset time has passed since the communication period started, in combination with other limitations, as specified in the independent claims 1, 9, and 10.

Regarding claims 11-13, the prior art fails to teach or suggest a beacon period determination method executed by a communication apparatus performing periodical communications with another communication apparatus via a transmission line, comprising the steps of determining an offset time based on one section among a plurality of sections which is obtained by dividing a variation cycle, and setting a beacon period that is synchronized with a power supply cycle, based on the offset time, as specified in the independent claim 11.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
